EN

Product Description
Acute quality control material for monitoring the performance of pH, PCO₂, PO₂, SO₂, hematocrit (Hct), fetal hemoglobin (HbF), total hemoglobin (Hb), total bilirubin (tBil), oxyhemoglobin (O₂Hb), carboxyhemoglobin (COHb), methemoglobin (MetHb), and creatinine. Each cartridge contains 4 syringes. The first 3 syringes contain reagent, salts and preservatives. The fourth syringe is a dilution solution. For use with Stat Profile Prime Plus Analyzers ONLY.

Intended Use
In vitro diagnostic use by healthcare professionals for monitoring the performance of the Stat Profile Prime Plus Analyzers.

Methodology
Refer to the Stat Profile Prime Plus Analyzer Instructions For Use Manual for Methodology and Principles.

Compartions

Controls Levels 1, 2 and 3 are buffered bicarbonate solutions containing dyes, salts and preservatives. Each level has a known pH and is equivalent to a arterial CO₂ and Hct values. Control Level 4 and 5 are buffered solutions containing known concentrations of tHb, O₂Hb, COHb, MetHb, and creatinine. These levels are intended for use with the Stat Profile Prime Plus Analyzers. Control 4 contains no substances of human origin; however good laboratory practices should be followed during handling of these materials. (REF. NOCLS DOCUMENT M26-12).

Intended Use
In vitro diagnostic use by healthcare professionals for monitoring the performance of the Stat Profile Prime Plus Analyzers.

Storage
Store at 2-8°C (37-45°F). DO NOT FREEZE.

Directions for use

Ensure cartridge is at room temperature prior to installation.

Level 1 and 2 will be charged with creatinine syringes prior to installation of the Control Cartridge. The 2 syringes are labeled and coded to correspond to the syringes on the cartridge.

1. Hold the syringe with tip side down and remove protective cap.

2. Attach one of the enclosed needles to the syringe. Remove the protective cover from the needle.

3. Slowly depress syringe plunger until the contents are dispensed. DO NOT PULL BACK ON THE PLUNGER TO FLUSH CONTENTS OF SYRINGE.

4. Remove the needle assembly from the syringe and discard it into a sharps container.

5. Repeat Steps 1-4 for the next Control.

6. Mix Cartridge well by gently inverting for 1 minute. Cartridge is ready for use.

Verify that the indicated Expected Ranges correspond to the Lot Number on the cartridge. Refer to Stat Profile Prime Plus Analyzer Instructions for Use Manual for complete details.

Limitations
DO NOT FREEZE. Store at room temperature (approximately 16-24°C). Therefore, it is critical to follow the temperature guidelines described in "Directions for Use". The Expected Range values are specific for instruments and controls manufactured by Nova Biomedical. Once installed, each Stat Profile Prime Plus cartridge may be used for a maximum of 21 days from the initial installation date or until the entire cartridge is discarded. The control system will indicate the cartridge is invalid. Each cartridge may be inserted and removed from the analyzer a maximum of 6 times.

Traceability of Standards
Total Hemoglobin (Hb) and Methemoglobin (MetHb) are traceable by using Cyanogenmethemoglobin method. Carboxyhemoglobin (COHb) and Oxygenated Hb (O₂Hb) are traceable using Spectrophotometry. Analyses are based to NIST Standard Reference Materials.

Reference Intervals
Control cartridges are formulated at normal and abnormal expected values in patient blood. The expected clinical range of these values in patient blood is referenced in Tietz, NW ed. 1988 Textbook of Clinical Chemistry. W.B. Saunders Co. Users may wish to determine Mean Values and Expected Ranges in their own laboratory.*

Expected Ranges
The expected range for each parameter was determined at Nova Biomedical using replicate determinations on Nova analyzers. The expected range indicates the maximum deviations from the Mean Value that may be expected under differing laboratory conditions for instruments operating within specification. Refer to Expected Ranges Table.

*Not available in the U.S. UU & UU are in use in Europe.

**Stat Profile Prime Plus Analyzers are not certified for use in the clinical laboratory.
