EN

Product Description
Aqueous quality control material for monitoring the performance of pH, PCO₂, PO₂, SO₂, hematocrit (Hct), fetal hemoglobin (HbF), total hemoglobin (Hb), oxyhemoglobin (O₂Hb), methemoglobin (MetHb), and deoxyhemoglobin (DyHb) in Levels 1, 2 and 3. It also contains Na⁺, K⁺, Cl⁻, iCa²⁺, Mg²⁺, Glucose, Lactate, BUN (urea), and Creatinine in Level 4 and 5. A storage kit consisting of 2 syringes filled with preservatives is included for cartridge activation prior to installation. For use with Stat Profile Prime Plus VET Analyzers only.

Intended Use

Intended for monitoring the performance of the Stat Profile Prime Plus VET Analyzers.

Methodology

Refer to Stat Profile Prime Plus VET Analyzer Instructions For Use Manual for Methodology and Principles.

Composition

Contains Levels 1, 2 and 3 are buffered aqueous solutions containing 5% salts and preservatives. Each level has a known pH and is equivalent to a known O₂, CO₂ and N₂ value. Levels 4 and 5 are buffered solutions containing known concentrations of Na⁺, K⁺, Cl⁻, Ca²⁺, Mg²⁺, Glucose, Lactate, BUN (urea), Creatinine and preservatives. Each pouch contains a minimum of 100 mL. Contains no latex. This product is for laboratory use only; however good laboratory practices should be followed during handling of these materials. (REF. NOVA DOCUMENT M29-T2)

Warnings and Cautions:

DO NOT INVERT OR SHAKE THE CARTRIDGE FOR AT LEAST 10 SECONDS. DO NOT SHAKE CARTRIDGE. Refer to Stat Profile Prime Plus VET Analyzer Instructions for Use Manual for complete information.

Follow standard practices for handling laboratory reagents.

Storage:

Store at 4°C (37-49°F). DO NOT FREEZE.

Directions for use:

Except controls are room temperature prior to installation.

Level 1 and Level 2 must be charged with creativity syringes prior to installation of the Calibrator Cartridge. The 2 syringes are inserted into the cartridge and the cartridge is charged.

Activate the cartridge as follows:

1. Hold the syringe and gently tap it side down and remove protective cap.

2. Attach the needle to the appropriate assembly to the syringe. Remove the protective cover from the needle.

3. Insert the needle and plunger until the connection is secure. Then gently tap the needle and plunger to remove air bubbles.

4. Gently tap the plunger until the connection is secure. Then gently tap the needle and plunger to remove air bubbles.

5. Remove needle/plunger assembly from plunger and discard in an appropriate sharps container.

6. Replace needle/plunger assembly from plunger and reinsert in an appropriate sharps container.

7. Mix cartridge well by gently inverting it for 1 minute. Cartridge is ready for use.

Verify that the Lot number on the Expected Range Table corresponds to the Lot Number on the cartridge. Refer to Stat Profile Prime Plus VET Analyzer Instructions for Use Manual for complete information.

Limitations

PO₂ values are converted with conversion factor ranging from 1% to 10%.TcO₂ values are converted with conversion factor ranging from 1% to 10%.PCO₂ values are converted with conversion factor ranging from 1% to 10%.

Creatinine values are converted with conversion factor ranging from 1% to 10%.

Deoxyhemoglobin (DyHb) and Methemoglobin (MetHb) are traceable by using Cyanmethemoglobin method. Carboxyhemoglobin (COHb) and Oxyhemoglobin (O₂Hb) are traceable by using Spectrophotometry. Analyses are traced to NIST Standard Reference Materials.

Reference Intervals

Concentrations are formulated at normal and abnormal expected values in patient blood. The expected clinical range of these values is published in Appendix I of Test, NWEd. 1989 Textbook of Clinical Chemistry, WB. Saunders Co. Users may wish to determine Mean Values and Expected Range Table values.

Expected Ranges

The expected range for each parameter will be determined by Nova Biomedical using replicate determinations on Nova analyzers. The expected ranges include the maximum deviation from the Mean Value that may be expected under off-label laboratory conditions for instruments operating within specifications. Refer to Expected Ranges Table.
